PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in Artificial Intelligence with hands-on experience building reliable backend, full-stack, ML, and AI systems. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, software design, REST APIs, microservices, databases, and cloud deployment. Experienced in developing maintainable production-oriented applications, debugging performance issues, collaborating with teams and stakeholders, and rapidly learning new technologies.

EDUCATION

Gokaraju Rangaraju Institute of Engineering and Technology Sep 2023 - Jun 2027
B.Tech in Computer Science Engineering, Artificial Intelligence Specialization CGPA: 7.85

TECHNICAL SKILLS

Languages: Python, Java, C, SQL

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming, Object-Oriented Design, System Design, Problem Solving

Software Engineering: REST APIs, Microservices, Distributed Systems, Service-Oriented Architecture, Debugging, Testing, CI/CD, Git, Agile/Scrum

Backend & APIs: FastAPI, Node.js, Express, JWT, RBAC

AI/ML & GenAI: Scikit-learn, PyTorch, XGBoost, YOLO, RAG, LLMs, Embeddings, AI Agents, LangGraph, Sentence Transformers, ChromaDB, Ollama

Databases: PostgreSQL, MySQL, MongoDB

Cloud, DevOps & Tools: AWS, Azure, Docker, Podman, Linux, Git, Query Optimization

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Developer - SaaS Clients Mar 2025 - Present

- Worked directly with clients to gather requirements and translate them into scalable frontend, backend, and database features; delivered 2 SaaS applications 2 weeks ahead of schedule.
- Engineered REST APIs handling 1K+ daily requests at 80% uptime, improving response time from 800ms to 360ms through query optimization and performance profiling.
- Strengthened reliability and security for 200+ user accounts using JWT authentication, role-based access control, and authorization checks, with zero reported incidents.

AI Intern - Vishwam AI Jun 2025 - Oct 2025

- Collaborated with a 4-member engineering team to standardize reproducible ML training workflows using DVC versioning and production deployment practices.
- Optimized Python preprocessing pipelines, reducing processing time from 45 to 23 minutes through profiling, feature optimization, and iterative engineering.
- Improved prediction accuracy from 84% to 92% on 50K+ records using feature engineering, systematic evaluation, and hyperparameter optimization.

PROJECTS

MYFI.AI - AI-Powered Personal Finance Assistant | Python, FastAPI, LangGraph, Ollama, ChromaDB, PostgreSQL

- Built a modular multi-agent application combining transaction processing, ML-based categorization, anomaly detection, RAG, and natural-language financial assistance.
- Developed a hybrid retrieval pipeline using Sentence Transformers, ChromaDB, and PostgreSQL to ground financial queries in relevant knowledge and exact transaction data.
- Implemented Monitor, Explainer, and Recommender agents with LangGraph conditional routing and shared state, exposing the system through FastAPI APIs.

AutoTuning.AI - AI Vehicle Diagnostics Platform | Next.js, Node.js, FastAPI, MongoDB, Docker, AWS

- Built a cloud-native vehicle diagnostics platform integrating computer vision, machine learning, REST APIs, Docker, and AWS for automated fault detection and maintenance recommendations.
- Designed modular backend services using FastAPI and Node.js, reducing diagnostic time from over 30 minutes to under 2 minutes while achieving 87% fault detection accuracy.
- Integrated YOLO-based component analysis across 20+ vehicle parts, achieving 92% mAP and supporting automated diagnostic workflows.

CERTIFICATIONS

AWS Certified AI Practitioner
Microsoft Azure Fundamentals (AZ-900)
Machine Learning Certificate - DeepLearning.AI, Coursera

ACHIEVEMENTS

Vice-President and PR - Free Software Wing, GRIET

- Led a 24-hour national-level hackathon with 200+ participants, secured INR 1 lakh+ sponsorship, supported 15+ working prototypes, and conducted 6 technical workshops for 200+ students.
